ANIMAL PHYSIOTHERAPY

REHABILITATION FOR YOUR BEST FRIEND!

Veterinary Physiotherapy is fast becoming an essential part of rehabilitation for dogs, horses and other animals.
Veterinary physiotherapy involves assessment and treatment techniques to prevent and manage a range of physical conditions, to promote healing and return to full function following injury or surgery, and to treat pre-existing conditions such as arthritis or general ageing.

What we can offer your animal

- pre or post surgery rehabilitation
- expert assessment and evaluation of movement dysfunction
- appropriate treatment to address poor movement patterning
- regular evaluation of treatment goals and amended treatment strategies
- advice and education for the owner on maintenance of the improved condition
